SERIES 3: SUSTAINABLE AGRICULTURE WORKING GROUP (SAWG). –1994-2000.

The Sustainable Agriculture Working Group (SAWG) was one of five working groups of the ICA. The predecessor to ICA, the ICFID, began funding agricultural projects in Africa, Asia and Latin America in 1974. In 1985-1986 the organization moved its focus to community based primary health and to sustainable agriculture. The sustainable agriculture program focused on innovative research and extension of sustainable agriculture in the above regions. They worked with intermediary NGO's which provided assistance to grassroots NGO's. With the amalgamation of ICFID and the Development and Service Committee into the ICA established the Sustainable Agriculture Working Group with a revised mandate: to promote transformative sustainable agriculture practise in selected countries through partnerships and funding relationships with both local intermediary and grassroots agencies; to encourage the collection and exchange of new learning agriculture; and to assist southern churches and non governmental organization in their advocacy of greater food security.
